## VINEYARD

Located in Central Valley, specifically in Villa Alegre, which belongs to the sub-region of Maule Valley. The climate here is Mediterranean-like, with an average annual rainfall of 735mm, dry summers and sunny days. The great range of temperature between day and night provides optimal conditions for the grape to develop ripe tannins and concentrated aromas and flavors.

## WINEMAKING

Harvest in mid-April. Fermentation in stainless steel tanks with selected yeasts at controlled temperatures ranging from 26° to 28°C, for 7 days. Stabilization, filtration and bottling.
